

## Table of Contents

### **Embedded C Programming, 1st Edition**

Introduction

Chapter 1: C Overview and Program Structure

Chapter 2: Constants

Chapter 3: Preprocessor Directives

Chapter 4: Data Variable and Types

Chapter 5: Expressions and Operators

Chapter 6: Statements

Chapter 7: Functions

Chapter 8: Arrays

Chapter 9: Structures

Chapter 10: Memory and Pointers

Chapter 11: Built-in Functions

Chapter 12: Strings

Chapter 13: Function-like Macros

Chapter 14: Conditional Compilation

Chapter 15: PIC<sup>®</sup> Microcontroller

Chapter 16: Discrete Input and Output

Chapter 17: Interrupts

Chapter 18: Timers/Counters

Chapter 19: Advanced Timing

Chapter 20: Analog Techniques

Chapter 21: Internal Serial Busses

Chapter 22: External Serial Busses

Chapter 23: Multi-tasking

Chapter 24: Inline Assembly

Chapter 25: Debugging

Appendices A, B and C
